This year, we continued to measure our performance and are proud to share that we delivered transformational growth to 65 clients.
How did we define transformational growth?
Some key parameters we set in place were growth in organic traffic, growth in leads, reduction in cost per acquisition, growth in ecommerce sales and more.

We also had conversations with direct customers to understand what transformational growth meant to them.

What was our process?
In our fifth year of creating the digital Report Card, the fact whether the nominated clients truly received transformational growth was subject to several internal reviews, debates and discussions with the senior management and leadership.

This was also built into the team's performance appraisals.
THE RESULT IN 2023—
WE DELIVERED TRANSFORMATIONAL GROWTH TO 65 CLIENTS
